NOTES—First Sheet.

G. R. S. III-2]

General and Revenue Secretariat.

San File No. 7 of 19 21

Serial No.

San 12 8-17-5 dated 15th Nov 1918, a fixed travelling allowance of Rs 8 per mensem for each of the vaccinators was sanctioned on the condition that they have been on tour at least 21 days in the months. In the same rule as amended by G.O. No 1793-8/2 San 84-18-6 dated 24.7.1919, the Sanitary Commissioner has been authorised to fix the minimum no. of cases for each taluk according to local circumstances. The Presidents of District Boards to retrench the travelling allowance due, if the work falls short of the minimum. Accordingly the Sanitary Commissioner after consulting the Presidents of District Boards, fixed the minimum number of cases to be performed by each vaccinator in the year at 31 primary vaccinations per thousand of the population in his charge. As the population in different taluks differs, the minimum no. of cases to be performed by different vaccinators also varies according to the density of population. Under this system, a vaccinator who has performed a larger number of cases in a densely peopled taluk may get a smaller allowance than one who has performed a lesser number of cases in a thinly populated taluk, because the minimum differs in the

to him. But while reporting on an anonymous petition presented to the Diwan, the Sanitary Commissioner had stated in his letter dt 14-8-22 that the prescribed standard of 31 primary cases of vaccination per year per thousand population represented the maximum output of work rather than the minimum possibility & suggested that it should be left to the local boards to suitably punish the vaccinators otherwise than by retrenching the fixed pt. This view was agreed to by the presidents of the district boards of all districts except Tumkur and the Presidents of the 2 Bds of Bangalore, Hosur & Chintamani stated that the minimum standard could not be achieved and recommended its being reduced. As the local conditions in different places vary with each other, a fixed standard governing all the parts of the State does not seem to be. In these circumstances the rule does not seem to require any modification and the Sanitary commissioner may perhaps be asked to fix the minimum in different places in consultation with the Presidents of local bodies.

HMK.
1.4.24

NOTE—Contn. sheet.

G. R. S. III-2.

General and Revenue Secretariat.

Secret File No. 7 of 1922

Serial No.

With the rule as it now stands, the Vaccinators are required to work not less than 21 days, and to perform 31 Vaccinations for every 1000 population. (iii) This was said to work hardship as it was not possible for them to get 31 cases even if they have worked fully as the birth rate usually is below the standard & any failure on their part to secure this number entailed reduction of their Travelling Allowance. (iv) According to the Sanitary Commissioner the birth rate is 45 per 1000; but he states that this may be taken, making allowances for unfavourable mortality at 30 per mille between age 1-5.

Para 3. R 7.

He now fixes the standard again for vaccination at 31 per mille ~~of population~~.

Whether this may be accepted is for orders.

(v) In para 4 of his letter of the 4th August 1922 he states, that it should be left to the Presidents of the Local Bds. to suitably remunerate the Vaccinators otherwise than by allowing

From Dr. H. B. Mylvaganam, F.R.C.S.(Engd.),
~~A. K. Pani, Esq., D. P. H.,~~ Etc.,
Offg. Sanitary Commissioner with the Government of
H. H. the Maharaja of Mysore, BANGALORE.

To

T. E. Jeyaram Iyer, Esq., B.A.,B.L.,
Secretary to the Government of Mysore,
Revenue Department, BANGALORE.

Sir

With reference to your memo No. L. 1151/San. 7-22-2 dated the 31st July 1922, I have the honor to state that the minimum of 31 primary vaccinations per 1,000 of population per annum, which has been approved in Government Order No. G. 9556-65/San. 95-18-19 dated the 31st October 1919 is based on the standard adopted by the Bombay Government. In Bombay, however, no retrenchment is made in the fixed travelling allowance for work falling short of the minimum. In case of default the vaccinator is first warned. If he does not improve he is dealt with by the Deputy Sanitary Commissioner of the District and a note is made in his character book which will come against him when his next promotion is due and he may be passed over for promotion. He may also be transferred to a less desirable taluk or he may be fined or reduced forthwith a number of places on the grade list.

2. In the Madras Presidency the fixed travelling allowance is liable to reduction where either a certain number of days has not been spent on tour or a certain number of cases has not been vaccinated. The minimum out-turn of work prescribed varies within limits of 500 and 250 cases a month and it is left entirely to the District Boards to

2. Revenue Secretary's letter No. 2063-70/San. 7-22-4, dated 2nd Septr. 22, calling for definite proposals on Sanitary Commissioner's recommendation that the payment of fixed T.A. to Vaccinators need not depend upon the number of vaccinations perfomed but on the number of days which they actually tour.

Resolution. The Board is of opinion that it is not desirable to remove the restriction as regards the minimum number of vaccinations to be performed and that the minimum maybe fixed with due regard to the population in the range of each vaccinator. It considers that the existing order about the Vaccinator's T.A. requires no modification except perhaps as regards the minimum number of vaccinations to be performed.

Health Officer

Office of the President, District Board,
Bangalore District,
Dated, Bangalore, 14th November 1922.

From,

B. Osman, Khan, Esquire.,
President, in charge, District
Board, Bangalore District.

To,

T. E. Jayarama Aiyer, Esqr.
Secretary to the Government of His Highness
the Maharaja of Mysore, Revenue Department, Bangalore.

Sir,

With reference to your letter No. L. 2063-70/San. 7-22-4 dated 2nd September 1922, in regard to the minimum number of cases of Vaccination to be performed by Vaccinators, I have the honor to state that the existing rules have been working well. As the President of the District Board is given the power to sanction the full travelling allowance for work falling short of the minimum, on satisfactory explanation being furnished for the deficiency, the rule is not causing any hardship on the Vaccinators. This will have a solutary effect on the work of the Vaccinators, who will know that their allowances would be retrenched if they do not turn out the minimum number of cases, and this is by far the better ways of testing their work in preference to the period spent outside head-quarters. It is however found from a study of the statistics of vaccinations performed during the past 10 years that the minimum of 31 cases per 1000 of population is, as observed by the Sanitary Commissioner, rather high and not easily attainable. I am therefore of opinion that the hardship complained of can be avaided by the reduction of the minimum to about 30 per 1000 of population.

2. A copy of the report of the Deputy Inspector of Vaccination on the subject is enclosed.

I have the honor to be,
Sir,
Your most obedient servant,

President, in charge, District
Board, Bangalore District.

No. 22-13 NOV 1922

Enclosure No. 1

Submitting report
in regard to the minimum
number of cases of vaccinat
to be performed by the vaccinator

Letter No.346 dated 27the October 1922 from the Deputy Inspector of Vaccination, Bangalore District to the President, District Board, Bangalore District.

With reference to your No.C.219/22-23 dated 12-9-22, forwarding copy of the letter No.3063-70/San.7-22-30 dated 2nd September 1922 from the Revenue Secretary to the Government and directing me to submit opinion on the subject referred to therein, I beg to submit herewith a statement showing the number of Primary cases performed by each Vaccinator in the District in each month commencing from January 1920 to December 1921, with the amount of fixed Travelling Allowance given to them every month, and to state that the Vaccinators have, in all, lost in their fixed Travelling Allowance Rs.772-6-6 in 1920, and Rs.399-4-9, in 1921, owing to a high number of minimum cases, they have to perform every month.

A statement showing the number of Primary cases performed by the Vaccinators in the District during the past 10 years is also submitted for favour of perusal, from which it will be observed that not even in a single year, either before or after granting the fixed - Travelling Allowance to the Vaccinators, the Primary cases performed in the District have reached the standard of 31 per 1000 of population, the average annual number of Primary cases Vaccinated in the District being 13581.5 or 17.89 per 1000 of population.

This shows that the District admits of only 17.89 cases per - 1000 of population and any exertion on the part of the working staff to attain higher rate of cases is not adequately appreciated.

Vaccination in the District is left to the option of the people and as such, any higher number of minimum cases than 17.89 per 1000 of population will really operate hardship on the Vaccinators. I request therefore, that the minimum number of cases may be lowered in the light of the statistics furnished.

The Vaccinators may willingly keep out for more than 21 days even, if they should. But there will be no any use by their doing so They must, as a proof of travelling for 21 days, turn out some substa -tial work, without which to give them pay and allowance for mere

travelling does not speak well of the Department. It is intended to vaccinate and thus protect children against the attack of Small-pox.

If the standard of 31 per 1000 of population is only lowered and fixed in the light of the statistics furnished, I am confident that each and every vaccinator in the District will not only keep out for 21 days, but will also try to the best of his ability to turn out the minimum number of cases fixed. Then, they will have no room to lose much of their fixed Travelling Allowance.

There will be also no necessity for the vaccinators being frequently brought to the notice of the higher authorities for punishment of short work.

Enclosure No. 1

5 DEC 1922

Sir,

With reference to your letter No.L.2063-70/San.7-22-4 dated 2nd September 1922 forwarding a copy of the Sanitary Commissioner's letter No.C.51-2 dated 14-8-1922 re the payment of fixed travelling allowance to the vaccinators and calling for definite proposals in the matter, I have the honor to state that the minimum of 31 primary vaccinators per 1000 population prescribed in G.O.No.G.9556-66 San.95-18-19 dated 31st October 1919 seems to be unworkable in this District as the out-turn of work turned out by the vaccinators during these years fell short of

the minimum prescribed in spite of best endeavours on their part to work out the prescribed minimum and get the fixed travelling allowance in full. I fully concur with the opinion of the Sanitary Commissioner that the payment of the fixed travelling allowance ought not to be connected with the number of vaccinations actually performed by the vaccinators during the month and the travelling allowance should be retrenched only if he fails to be on tour for at least 21 days in the month leaving it to the Presidents of the Taluk Boards to punish the vaccinators otherwise than by reducing the fixed travelling allowance for unsatisfactory work. Copy of the resolution of the Board on the subject is also enclosed herein for reference.

I have the honor to be,

Office of the President,
District Board, Shimoga District,
Dated Shimoga 20/21st December 1922.

No. C. 225/L.B.22-23.

From

G. Aravamuduiengar, Esquire, B.A., B.L.,
President, District Board,
Shimoga District.

24 DEC 1922

To

T.E. Jayarama Iyer, Esquire, B.A., B.L.,
Secretary to the Government of Mysore,
Revenue Department, Bangalore.

Sir,

With reference to your letter No. L. 2063-70/San.7-22-4 dated 2nd September 1922 calling for the submission of proposals on the Sanitary Commissioner's recommendation regarding the minimum number of vaccinations to be performed by each Vaccinator, I have the honor to state that the present restriction of reducing the fixed travelling allowance payable to vaccinatorsin proportion to the decrease in the number of vaccination performed in each month to the minimum number prescribed, works really as a hardship. The travelling allowance is paid mainly to defray the touring charges and it is proper that the fixed travelling allowance should be paid provided the Vaccinator has camped out and toured for a certain fixed period in each month and this may be fixed as 20 days in a month. As regards the quantity of work to be turned out the Presidents of Local Bodies may be given the full discretion of suitably punishing the Vaccinator whenever the work turned out is found unsatisfactory in view of the local conditions.

2. Further at present the fixed travelling allowances of the Vaccinators are drawn on separate bills which causes unusual

delay

delay and confusion. To avoid this the allowances may be drawn along with the pay every month and disbursed. Any reduction necessary may be effected in subsequent bills as noted in para 1 supra.

I have the honour to be,

Sir,

Your most obedient servant,

President,

District Board, Shimoga District.

G.V./

San 7-22-12

To

T. E. Jayaram Iyer, Esq., B.A., B.L.,
Secretary to the Government of His Highness
the Maharaja of Mysore, Revenue Department,
Bangalore.

Sir,

With reference to your letter No.2063-70/San.7-22-4 dated the 2nd September 1922 calling for definite proposals regarding the minimum number of cases of vaccination to be performed by each vaccinator, I have the honour to state that as opined by the Sanitary Commissioner it would be no doubt a hardship if the fixed -- travellance of the vaccinator should be retrenched for not performing the prescribed minimum number of cases of vaccinations. The vaccinator can be ~~prescribed~~ furnished for default of his work in other ways such as by warning, fining and transferring to unhealthy localities

2. If he is found a persistent defaulter in his work, his promotion may be stopped. These several punishments can be inflicted by the President of the District Board who has got the power of appointing them.

3. As suggested by the Sanitary Commissioner in para 4 of his letter No.C.51-2 dated the 14th August 1922 to Government, the payment of fixed travelling allowance need not be connected with the number of vaccinations performed by the vaccinators, as, in addition to the circumstances noted above, this may sometimes be due to causes beyond the control of the vaccinators, such as short supply

Sir

With reference to the correspondence ending with your letter No. L. 6435/San. dated the 14th February 1924, I have the honor to submit herewith, for the approval of Government, the draft amendment noted below of para 11 of the rule's issued with Government Order No. L.3840-59/San. 51-22-4 dated the 21st November 1923 in connection with the direction and supervision of vaccination in rural areas :-

The grant of travelling allowance to Vaccinators will depend upon their satisfying the following conditions:

i. itineration for twenty one days in the month, health and weather permitting,

ii. a satisfactory out-turn of work, and

iii. general correctness of the vaccination returns as certified to, after verification, by the local Sanitary Inspector.

Every Vaccinator will be expected to be able to perform annually primary vaccinations equivalent to 31 per mille of population in the area assigned to him for duty. A Vaccinator whose work does not come up to this standard may in the discretion of the President of the District Board, be punished with a fine. In case of continued default, a note will be made in the Vaccinator's character book which will come against him when his next promotion is due and he may

may be passed over for promotion. He will also be liable to be reduced forthwith a number of places on the grade list.

If the Vaccinator fails, without a reasonable excuse, to be on tour for 21 days in the month, the President of the District Board will be competent to retrench the fixed T.A. proportionately to the number of days the itineration falls short of the minimum number of days prescribed.

I have the honor to be,

Sir,

Your most obedient servant,

SANITARY COMMISSIONER.

PROCEEDINGS OF THE GOVERNMENT OF
HIS HIGHNESS THE MAHARAJA OF MYSORE.

San 7-22-14

R e a d.-

Rule 11 of the rules issued under G.O. No. L.3840-59/San.51-22-4 dated the 21st November 1923 prescribing the conditions in regard to the grant of fixed Travelling Allowance to Vaccinators.

2. Correspondence ending with letter No. C.557-5 dated the 31st March 1924 from the Sanitary Commissioner in Mysore suggesting an amendment of the rule as follows:-

(i) itineration for twenty-one days in the month, health and weather permitting,

(ii) a satisfactory out-turn of work, and

(iii) general correctness of the vaccination returns as certified to, after verification, by the local Sanitary Inspector.

Order No. L.9609-18/San

Bangalore, the 12th ~~April~~ June 1924.

In the rule as it now stands, the Vaccinators are required to tour not less than 21 days and to perform not less than 31 vaccinations per 1000 pupulation to enable them to draw the fixed Travelling Allowances. While reporting on an anonymous petition praying that fixed Travelling Allowances sanctioned to Vaccinators need not be reduced if the number of cases per mille of popula-

proposed full work after minimum fixed viz 31 primary cases

tion per annum, the Sanitary Commissioner

er ~~had stated~~ reports that, considering the birth rate and making allowances for infantile mortality, the possible maximum worked up to 31 cases. He is therefore of opinion that every Vaccinator might be able to perform annually primary vaccinations equivalent to 31 per mille of population in the area assigned to a vaccinator. Government are not in favour of fixing a uniform standard for all Districts and localities. In thickly populated places, 31 cases might perhaps be possible, but this does not seem to be workable in Malnad and sparsely populated localities. In these circumstances Government are pleased to direct that the standard for each locality or area should be fixed from time to time by the Presidents of the District Boards in consultation with the Sanitary Commissioner. In para 4 of his letter No. C.51-2 dated the 14th August 1922, the Sanitary Commissioner has stated that it should be left to the Presidents of the Local Boards to suitably punish the Vaccinators otherwise than by reducing their fixed Travelling Allowance, if their work is not found satisfactory This suggestion is accepted.

The Sanitary Commissioner is therefore requested to send up a revised draft of amendment in accord-

ance

with the above view.
